Idea/Approach Details

- The tourism industry has been severely impacted by the COVID-19 pandemic and local businesses need a boost in bookings and visibility. Travelers seek unique, personalized, and safe experiences.
- The Tour Techies vision aligns with the demand and revolutionizes the tourism sector by creating integrated platform
- The Tour Techies contribute to the Digital India initiative by providing features like AI-driven recommendations,local insider tips and a seamless booking experience that improves the efficiency and effectiveness of the tourism sector.
- All in all travelers are more likely to opt for cheaper airfares if the cost difference is visually represented before them for their exhilarating journey.
- One of the key advantages of mobile apps for travel and tourism is round-the-clock availability for support.

Idea/Approach Details

Our Ideas, Solutions and Prototypes

Destination Exploration: Users can explore information about various destinations, including attractions, historical sites, natural wonders hotels and vacation rentals.

Local Cuisine and Dining: Discover local restaurants, cafes, and eateries, with information on cuisine types, menus, and user reviews and ratings.

Transportation Information: Access information about metro and car rentals Our app compares cabs and taxi's charges for your entered destination and will redirect the customer to that.

Emergency Assistance: Offer contact details and information on local emergency services, hospitals

Traveler Support: Offer customer support through feedback mechanism to assist with inquiries, issues, and emergencies during the trip.
